Minimum Deployment Environment Requirements / DX Retail®

POS Updates Made Simple with Centralized Remote Management

DX Retail®, one of the DFS DX™ connected solutions plaform, is a cloud-based solution that makes it easier than ever to update all your stores' Prizma and DFS Self-Checkout Kiosk systems securely and efficiently. The ability to remotely drive updates to a single site or to hundreds of sites simultaneously is a significant time saving and ensures your sites are updated with the latest retail items and pricing.
