Revolutionary Cloud-Based Fleet Management

When it comes to managing fleet fueling operations, accountability and precision are key. In addition, fleet business owners need to be able to oversee operations from afar, with complete visibility over their fleet drivers at all times, wherever they are located.

DX Fleet is a revolutionary, cloud-based fuel management solution that provides fleet owners, operators, and managers a connected experience through the use of interlinked devices and the ability to remotely monitor their entire fleet fueling enterprise digitally. DX Fleet delivers real-time monitoring of your fleet vehicles, proprietary cards, transactions, alerts, notifications and reports. Additionally, fleet users can leverage a mobile application for fueling authorizations, which provides an easy and innovative alternative to standard fleet cards.

It's Time to Invest in Your Future

Manage Your Fleet Fueling Enterprise From a Single Cloud-Based Interface

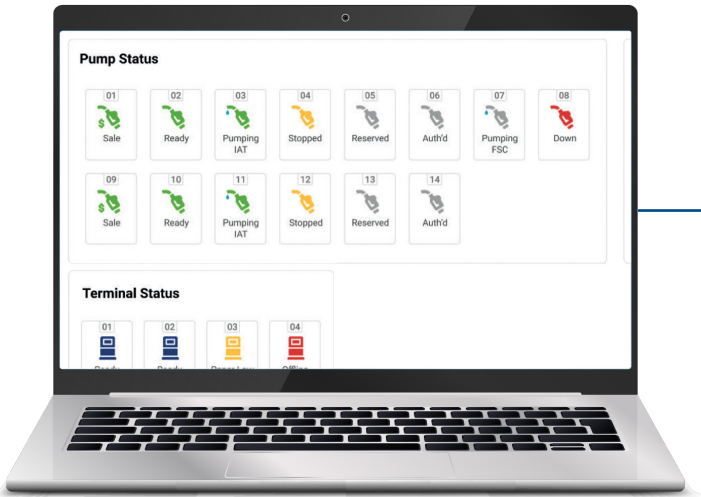

- Determine user access rights, analyze transactions, view reports and leverage business insights to improve business efficiency and reduce costs
- Reduce operational costs by consolidating card management to a central location that can be managed via the web portal
- Easily add, remove or update accounts for all sites from a centralized and online location
- Proactively manage site status to improve performance and decrease unscheduled downtime

Real-Time Data Driving Real-Time Decisions

- Real-time visibility to fueling data, transactional information and alerts generated by devices
- Provides the user with the ability to see up-to-date information, fuel inventory, system diagnostics and generated alerts in a centralized location
- Manage your fleet fueling operations and transactions with reports in real-time
- Create intuitive dashboards for different types of users

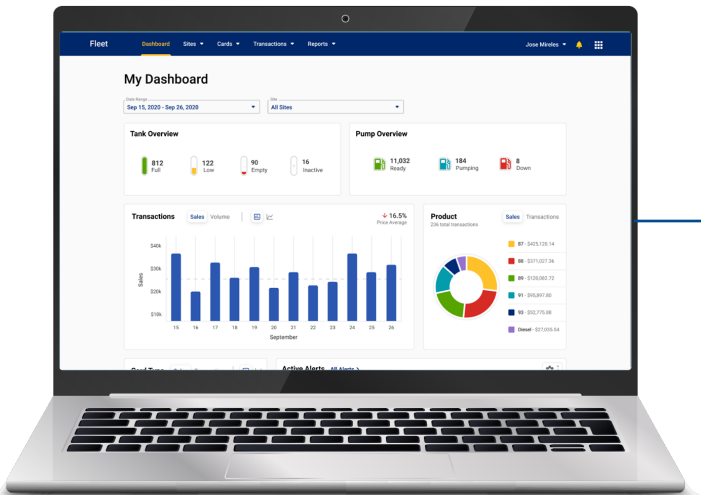

Move to Mobile

- Provide an alternative to standard physical fleet cards with the DX Fleet mobile application, which offers fueling authorization from a mobile device
- Manage your fleet enterprise from anywhere on your mobile device

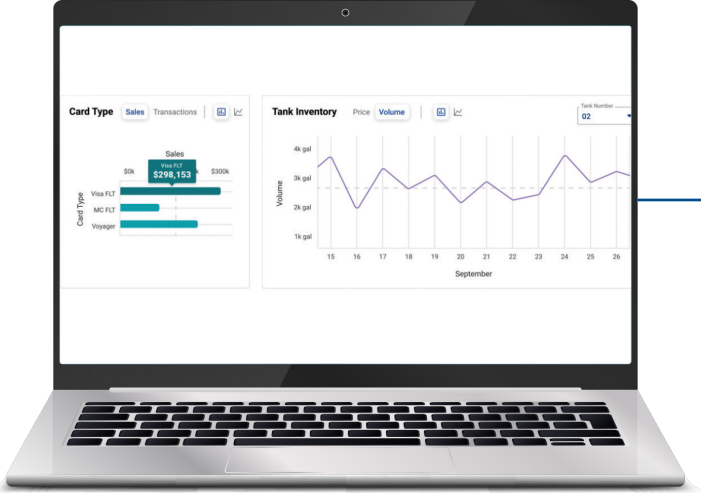

Device Alerts and Notifications

The ability to proactively manage site status to improve performance and decrease unscheduled downtime.

Centralized Dashboard Visibility

Provides the user the ability to see up-to-date information, fuel inventory, system diagnostics and generated alerts in a centralized location.

Device Alerts and Notifications

Real-time visibility to fueling data, transactional information and alerts generated by device.

The Features that Make it Possible

Graphically-Enabled and Tiered Dashboards

Decrease operational costs and unplanned downtime by quickly finding the information most important to sites and/or organizations.

Centralized Controller Management and Configuration

Reduces service visits to sites by enabling remote capabilities to manage FMS controllers from the cloud.

Cloud-Based Account Management

Reduces operational costs by consolidating card management to a central location that can be managed via the web portal.

Real-Time Visibility to Fueling Data, Transactional Information, or Alerts Generated by Devices

Improves performance and decreases unscheduled downtime by providing the ability to proactively manage sites based on status or alerts.

Web-Based Cloud Application Built on Microsoft Azure's Security Features, Data Integrity and Confidentiality

Eliminates the need for additional IT infrastructure and resources as the implementation is server and computer-independent.

DFS and Microsoft: Driving Digital Transformation

Fleet solutions are what keep many businesses running optimally. With such dependance on these solutions, fleet operations must be reliable and easily monitored from afar by fleet owners to ensure the highest levels of security and accountability.

DX Fleet runs on Microsoft Azure. Customers can access their data remotely at any time, and of course, fuel stations get the data integrity, state-of-the-art security features and confidentiality they have come to expect from Azure solutions. Cloud hosting allows for system monitoring and alerts that keep users informed and data secured at the proper levels of permissions. Cloud-based card management allows users to easily validate, add, or remove cards, manage limits and set up rules from a central location through the onsite controller.

DFS DX™ Connected Solutions Platform

DX Fleet is just one of five solutions in the DFS DX connected solutions platform. DFS DX delivers operational cost reductions, increased sales and an enhanced customer experience through a combination of intelligent fueling and retail solutions. This solution is the industry's first open, global and common cloud platform that harnesses advanced analytics and IoT and to deliver five core innovative solutions focused on customer experience and asset optimization.

Drive Increased Sales Revenue

When it comes to fuel stations, compliance and security are critical. Powered by Microsoft Azure, the software applications that comprise the DFS DX connected solutions platform uses intelligent software to provide ongoing updates on the state of your devices. The solution suite uses Azure Stream Analytics to expedite data creation and alert you to potential issues.

Maximize Site Assets and Operational Efficiency with IoT

From the tank to the payment module, the operational efficiency of your entire retail station has a direct impact on your bottom line. The DFS DX connected solutions platform helps you streamline operations and optimize site assets.

Increase Safety and Security with the DFS DX Platform

Many locations operate retail, car wash, or other related businesses, and these can be vital for your bottom line. Promote products and services at the dispenser to drive in-store foot traffic and sales, increase customer loyalty, and deliver an overall enjoyable customer experience.
