Compact Connection, Enhanced Control

Introducing DFS Fusion Prizma, a trailblazing automation server that combines the best Dover Fueling Solutions® (DFS) forecourt controller (FCC) and point-of-sale (POS) system to provide seamless connectivity between forecourt equipment. Building on the proven success of the Wayne Fusion® automation server version 3, Fusion® Prizma facilitates dispensers, tank gauging systems, and price signs to seamlessly interface with HOS and ERP systems. With Prizma software fully integrated, this automation server also enables POS, remote connectivity, and back-end reporting in one compact but powerful package.

Fusion® Prizma is packed with performance-enhancing technology, featuring faster speeds, better responsiveness, and expanded connectivity options, which helps reduce deployment, implementation, and maintenance costs. This advanced automation server also provides one single point of control – meaning, no matter where a fuel retailer is, they can find the information they need, effortlessly.

With this automation server you get the best of both worlds. Think seamless integration, increased visibility and enhanced control. Think DFS Fusion® Prizma.

Performance Enhancing Technology

The Fusion® Prizma automation server features faster speeds, better responsiveness and expanded connectivity options. It provides the control you expect from DFS with the easier access and serviceability you've asked us for – not to mention built-in remote accessiblity and POS.

Need to seamlessly connect your existing retail systems with your forecourt? **No problem.**

We use both standard and proprietary protocols for integration, such as IFSF FDC, to ensure smooth and secure connection. Fusion® Prizma is also future proofed to easily accept new devices and protocols as they're needed.

Want real-time visibility of information that will help you make smarter business decisions? **The Fusion® forecourt system can do that too, anytime and anywhere.**

But perhaps the most compelling benefit of Fusion® Prizma is that it's connected to the experience, expertise and support of DFS.

FUELING SOLUTIONS®

Control Where You Need It Most

Control Over Costs

By giving you better visibility over many of your current devices with one single tool, it helps to reduce maintenance costs so there are fewer potential points of failure. Simply plug in the Fusion® Prizma automation server, hook up your devices, and within minutes, you're connected and in control.

Control Over Your Future

Fusion® Prizma is designed to easily expand with your growing business needs. This server is flexible and upgradeable and as your business continues to evolve, you can readily add software and hardware to keep up. The system comes IoT ready, which means it can provide easy access to the DFS DX™ connected solutions platform to give your forcourt a revolutionary digital transformation.

Control Over Data

With Fusion® Prizma's in-depth web-reporting capabilities, you get better visibility over sales, operations, inventory and equipment, so you're better equipped to make smart business decisions. With built-in remote accessibility, you can also find the information you need – no matter where you are or what time it is.

Control Over Complexity

By interfacing with a large number of forecourt devices, Fusion® Prizma system gives you one single point of control. This flexibility enables all of your key systems to speak the same language and provides you with one single interface.

Control Over Clutter

Fusion® Prizma provides all of this control in a single, streamlined solution configured specifically for the rugged demands of a petroleum-retail environment. With its solid-state construction, Fusion® Prizma is also built to withstand extreme temperatures and dust.
